FIELD NOTES

OF THE

DEPENDENT RESURVEY

OF

THE NORTH BOUNDARY

AND

THE SUBDIVISIONAL LINES,

TOWNSHIP 54 NORTH, RANGE 75 WEST,

OF THE SIXTH PRINCIPAL MERIDIAN,

IN THE STATE OF WYOMING.

EXECUTED BY

RICHARD A. KOHLER

CADASTRAL SURVEYOR

Under Special Instructions dated AUGUST 28, 2000, approved AUGUST 28, 2000, which provided for the surveys included under Group Number 679, and assignment instructions dated AUGUST 28, 2000.

Survey commenced SEPTEMBER 28, 2000

Survey completed SEPTEMBER 27, 2001

CHAINS

The following field notes are those of the dependent resurvey of the north boundary and the subdivisional lines, Township 54 North, Range 75 West, Sixth Principal Meridian, Wyoming.

The history of surveys pertaining to this resurvey is as follows:

Mortimer N. Grant surveyed the exterior boundaries and the subdivisional lines in 1883. Charles Holcomb retraced the west and north boundaries in 1883. Richard A. Kohler dependently resurveyed the west boundary in 1988-89. Joel T. Ebner dependently resurveyed the south boundary in 1994-95 and the east boundary in 2000.

Survey notes of Jesse E. Spielman, Campbell County Surveyor in the early 1900's, indicate that he resurveyed a portion of the north boundary sometime after 1917.

The survey was executed in accordance with the specifications as set forth in the Manual of Surveying Instructions, 1973, and the Special Instructions for Group No. 679, Wyoming, dated August 28, 2000.

Preliminary to the resurvey, the lines of the previous surveys were retraced and diligent search was made for all corners and other calls of the field note record. Identified corners were remonumented in their original positions; lost corners were reestablished and monumented at proportionate positions based on the latest official record, but only after exhausting every possibility of finding direct evidence of such corners. The retracement data were thoroughly verified and only true line field notes are given herein, which refer to the completed survey.

The survey was executed with TRIMBLE Series 4000SSi and Model 4700 Global Positioning System (GPS) receivers, a LIETZ Model SET4 electronic total station and by chaining methods. The instruments were maintained in proper adjustment at all times. The directions of all lines refer to the true meridian, based on geodetic north as determined by GPS observations. GPS control network and supporting data are contained in the official group file.

The geographic position of the southeast corner of the township, based on NAD 83(1993) and determined by real-time kinematic methods, is:

Latitude 44° 36' 34.767" N., Longitude 105° 49' 05.154" W.

The mean magnetic declination is 11½° E.

The terrain varies from gently rolling to mountainous, with the elevation ranging from about 3,860 feet above sea level, where Middle Prong Wild Horse Creek crosses the west boundary, to about 4,600 feet above sea level along the divide west of Box Draw near the east boundary of the township. The soil varies from gravelly loam to rocky clay with areas of exposed scoria. Vegetation consists of a light to moderate growth of sagebrush and native grasses throughout with scattered areas of juniper in the higher elevations.</p> <p>Primary drainage is provided by Middle Prong Wild Horse Creek, which courses west-northwesterly through the southwestern portion of the township. The northwestern portion is drained by North Prong Wild Horse Creek and its tributary draws, and the northeastern portion by Linn Draw and Box Draw. The Smith ranch is located in section 2 and the Spellman ranch in section 32, the area being suitable for grazing purposes. Gas exploration and development is currently in progress.</p> <p>Access to the northern portion of the township is provided by ranch roads and trail roads leading south from U.S. Highway No. 14 and 16, and to the southern portion by Middle Prong Road, which follows along Middle Prong Wild Horse Creek with trail roads leading north from it throughout the township.</p>

CERTIFICATE OF SURVEY

I, Richard A. Kohler, Cadastral Surveyor, HEREBY CERTIFY upon honor that, in pursuance of special instructions bearing date of the 28th day of August, 2000, I have dependently resurveyed the north boundary and the subdivisional lines, Township 54 North, Range 75 West, of the Sixth Principal Meridian, in the State of Wyoming, which are represented in the foregoing field notes as having been executed by me and under my direction; and that said survey has been made in strict conformity with said special instructions, the Manual of Instructions for the Survey of the Public Lands of the United States, and in specific manner described in the foregoing field notes.

MAY 31 2002

(Date)

(Cadastral Surveyor)

CERTIFICATE OF APPROVAL

BUREAU OF LAND MANAGEMENT
Cheyenne, Wyoming

The foregoing field notes of the dependent resurvey of the north boundary and the subdivisional lines, Township 54 North, Range 75 West, Sixth Principal Meridian, Wyoming, executed by Richard A. Kohler, Cadastral Surveyor, having been critically examined and found correct, are hereby approved.
